1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims 1-34	YES
	Claims NONE	NO
Inventive Step (IS)	Claims 1-34	YES
	Claims NONE	NO
Industrial Applicability (IA)	Claims 1-34	YES
	Claims NONE	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-34 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a hair drying comprising a housing having an air inlet and an air outlet; a heater being positioned in said housing; a motor being positioned in said housing; and a fan being operatively connected to said motor, said fan having one or more hubs having a plurality of blades wherein said housing has an inner annular sleeve surrounding said fan, said inner annular sleeve being positioned to form an air gap between said housing and said inner annular sleeve or wherein said inner annular sleeve is positioned to form an air gap between said housing and said inner annular sleeve, and wherein said inner annular sleeve has one or more apertures or a controller for selectively controlling said one or more hubs and/or said motor to selectively and/or separately manipulate the operation thereof, wherein said one or more housing apertures are positioned between said air inlet and said air outlet or a fan being operatively connected to said motor and being positioned part-in and part-out of the housing or a quiet shot control switch for instantaneously reducing said rotational speeds of said fan to facilitate quieter operation thereof.

Claims 1-34 meet the criteria set out in PCT Article 33(4), and thus meet industrial applicability because the subject matter claimed can be made or used in industry.
